PROJECTS

EVGV, SpartaHackathon 8   Jan 2023
- Full-stack web application utilizing Django, Python, HTML, CSS, JS, and used Git for collaboration.
- App made to parse from a file and compare over 5000 different vehicles along with their spec/edition.
- We made over 100 vehicle comparisons, which impacted user's decisions in buying their next vehicle.
- Our app calculated emissions, prices, mpg difference, and carbon change percentage between vehicles.

Blackjack
- Casino Blackjack replica made using JavaScript, HTML, CSS & with built-in dealer and card visuals.
- Restricts new cards if the user has lost/won and allows users to enter their name and betting amount.
- Allows the user to reset by beginning a new game and change the betting amount after each game.

MathHelper
- Created a simple math web app using Python, HTML, CSS, and Flask, and utilized built-in libraries.
- Range of numbers and operations suitable for all ages and can be used for quick action math quizzes.
- Built-in fatigue; returns motivational messages for all answers input by the user to improve endurance.

EXPERIENCE

Warren City Hall

Data Entry Clerk - seasonal   November 2020 – Present
- Manually entered and processed information diligently for those who were not in the system already.
- Used computer database to input sensitive information, identify citizens in precinct, and issue ballots.
- Led citizens to correct precinct location and registered citizen ballots into private software database.
- Scanned information, made calls, and typed in required information provided directly from customers.

Walgreens

Customer Service Associate   Apr 2022 – July 2022
- Assisted large volumes of customers daily with a positive attitude and focus on customer satisfaction.
- Informed customers about special promotions and provided detailed information for various products.
- Well-versed in registry/pos system, keeping inventory, and communicating with customers over phone
